

Stillwaters - Green Climatisation solution

A silent and environment-friendly way to cool telecom equipment

Introduction

Within the ACE concept, TKF announces an environment-friendly solution for cooling. The Stillwaters solution entails the concept to lead the superfluous heat into the ground, using water as medium. The performance is higher compared to conventional air conditioners and above all Stillwaters is very silent.

Stillwaters advantages are:

- low energy consumption
- no disturbing noise
- low maintenance / OPEX
- a yearly reduction of over 22 tonnes CO₂

Products

The Stillwaters solution is available in the power range from 1 to 40 KW. ACE offers the system as a complete climate control solution.

The solution consists of the stand-alone units with heat exchangers, the control functions and the underground installation.

ACE

ACE is a certified and guaranteed total concept for passive FTTx networks. As a total concept ACE provides the broadband market with a new vision on building fibre optic networks. ACE does not only consist of products, but also guarantees compatibility between all the different components and offers complete, passive solutions.

The ACE concept covers the following fields of applications:

• POP solution

• OSP solution
- Direct Buried
- Modular
- Aerial

• Subscriber solution
(SDU and MDU)
